

Recycling is one of the best and easiest ways to impact the environment. Recycling preserves natural resources, eliminates waste and reduces financial expenditure.

OVERCURRENT DEVICE RECYCLING PROGRAM

- Recycle fuses, circuit breakers or electrical contactors

FOUR STEP PROCESS

1. Revere to provide a pre-assembled box that you would place in your plant
2. Fill the box with ANY BRAND of fuses, circuit breakers or electrical contactors
3. When the box is full, seal and apply pre-paid, pre-addressed label
4. Send box UPS with your next shipment or give it to your Revere Account Manager

Fluorecycle is dedicated to the protection of the environment and the reduction of hazardous mercury waste to our landfills. Recycling lamps and ballasts with our pre-paid recycling program has never been so easy.

- Pre-paid program where Revere will pick up your lamps as requested for recycling
- IEPA approved Lamp Destruction Certification
- Mercury recovery to 99.99% pure
- Capable to recycle all types of mercury containing lamps and batteries
 - Fluorescent, HID, UV, CFL and specialty lamps
- 99% of all lamp components are recycled back to the industry
- Ultra low emission to the environment

Other products we recycle:

- Batteries
- Ballasts
- Capacitors-oil filled
- Printers
- Hard drives
- Keyboards
- Modems
- Circuit boards
- Computer monitors
- Thermostats
- Thermometers
- Blood pressure units
